

**COLD FIRE® Suppressant in 12 oz. Aerosol Cans**  
*The most powerful, compact and efficient extinguisher on the market!*

**Usage:**

The product can be used:

- To cool down hot surfaces rapidly for added safety and increased productivity.
- As a heat barrier spray to help prevent heat damage and the possibility of hidden fires.
- To extinguish small start up spot fires.

These unique capabilities make COLD FIRE® an excellent safety product for plumbers, welders, roofers, and mechanics all who work with hot surfaces and open flame. For personal safety at home and on the job, keep a can or bottle in your car, boat, workshop, kitchen and garage. These units are light in weight and easy to handle. The aerosol cans spray in any direction, even upside down for use in hard to reach places. The units can easily be carried in tool box or you can attach our convenient ready to use holster to your tool or radio belt for immediate accessibility.

**FIRE PRO LLC FIRE BLANKET**

**YOUR KITCHEN ALSO NEEDS A FIRE BLANKET FOR COOKING FIRES! SIMPLE TO GRAB AND USE. VERY ECONOMICAL! GREAT TO HAVE AROUND AT SCHOOLS, GRILLS, OFFICE, VEHICLES AND SHOPS!**

A FIRE BLANKET QUENCHES FIRE THROUGH ITS SPECIALIZED MATERIALS AND ANTI-FIRING FEATURES. THE MAIN INGREDIENT OF FIRE THAT TRIGGERS IT TO IGNITE IS OXYGEN. THE MAIN WORKING PROCEDURE OF THE FIRE BLANKET IS TO CUT OFF THE OXYGEN SUPPLY TO THE FIRE. THE FIRE BLANKET CUTS OFF THE OXYGEN SUPPLY TO THE FIRE WHEN IT'S WRAPPED AROUND THE FIRE. AS A RESULT, THE OXYGEN CONTENT OF THE FIRE DECREASES, AND CARBON DIOXIDE INCREASES WHICH ALLOWS THE FIRE TO DIMINISH.
